

IELTS Writing: AI & Tech Ideas Bank

Book 10 · Ready ideas for the hottest 2026 essay themes

Stratum IELTS · stratumielts.com

Edition 2026 · Original content

Part of the Stratum IELTS Writing Guide Series

Who this book is for

You freeze when the question says **AI, automation, social media, data privacy, online learning**.

This is an **ideas bank**, not a template script.

Use 2 ideas + examples, then write in your own sentences (see Book 8).

How to use

1. Identify the question type (opinion / discuss / advantages / problem-solution / two-part).
2. Pick **2 ideas** from the matching theme.
3. Add one concrete example for each.
4. Write with Book 1 structure.
5. Check at stratumielts.com.

Do **not** memorise full essays. Memorise *angles*.

Contents

1. Theme map 2026
 2. Artificial intelligence & automation
 3. Social media & digital life
 4. Online learning & edtech
 5. Data privacy & platform power
 6. Remote work & digital jobs
 7. Mini sample outlines
 8. Practice prompts
 9. Next step
-

1. Theme map 2026

These tech angles appear often in modern Task 2 prompts:

Theme	Typical angle
AI	jobs, education, decisions, creativity
Social media	attention, misinformation, relationships
Online learning	access, quality, motivation
Privacy	data collection, surveillance, rights
Remote work	flexibility vs isolation / inequality

Combine with classic lenses from Book 7: people, money, fairness, skills, health.

2. Artificial intelligence & automation

Useful idea angles

1. **Productivity** — AI speeds routine tasks (scheduling, drafting, data sorting)
2. **Job change** — some roles shrink; new roles appear (AI support, data quality, oversight)
3. **Education help** — personalised practice for learners
4. **Education risk** — over-reliance weakens independent thinking / enables cheating
5. **Bias & accountability** — automated decisions can be unfair without human review
6. **Access gap** — well-funded schools/companies benefit first

Example seeds

- office worker using AI to summarise reports
- student using AI feedback, then rewriting personally
- hiring tool screening CVs with possible bias

Position tips

- “AI should assist, not replace human judgment in high-stakes decisions.”
- “Benefits outweigh risks *if* regulation and education keep pace.”

3. Social media & digital life

Idea angles

1. Connection across distance
2. Business/creator opportunity
3. Distraction and shorter attention
4. Misinformation spreading quickly
5. Comparison culture / mental pressure

6. Need for digital literacy in schools

Example seeds

- families abroad staying in contact
- small shop finding customers online
- teens losing study focus to endless feeds

Balanced discussion tip

Body 1 = social/economic benefits

Body 2 = wellbeing/misinformation costs + your judgement

4. Online learning & edtech

Idea angles

1. Access for remote/working learners
2. Lower travel/housing cost
3. Flexible pacing
4. Weaker face-to-face interaction
5. Motivation / self-discipline problems
6. Unequal internet devices/connection

Strong pair for essays

- Body 1: access & flexibility
 - Body 2: quality/interaction limits → blended learning as solution (if asked)
-

5. Data privacy & platform power

Idea angles

1. Personalisation convenience
2. Targeted services/health reminders
3. Risk of data misuse / leaks
4. Weak consent understanding by users
5. Need for stronger regulation and transparency
6. Trade-off: free services vs paid privacy-respecting alternatives

Useful stance

Convenience is real, but users need clearer control and stronger legal protection.

6. Remote work & digital jobs

Idea angles

1. Better work-life balance / no commute
2. Access to global talent / jobs outside big cities
3. Company cost savings
4. Isolation / weaker team culture
5. Blurred boundaries (always online)
6. Inequality: not all jobs can be remote

Example seeds

- parent working remotely while living near family
- junior staff struggling without in-person mentoring

7. Mini sample outlines (not full essays)

A) Opinion — AI in schools

Position: Agree with careful classroom use.

Body 1: personalised practice improves weak skills

Body 2: teachers must guide ethics and prevent copy-paste dependence

Example: AI grammar feedback + student rewrite requirement

B) Discuss both — social media for young people

View A: learning resources + communities

View B: distraction + mental pressure

Opinion: useful with limits and digital literacy education

C) Problem/solution — misinformation online

Problems: rapid spread; hard to verify sources

Solutions: school media literacy; platform labelling; public fact-check campaigns

D) Advantages outweigh? — remote work

Advantages: flexibility, wider job access

Disadvantages: isolation, home/work blur

Judgement: advantages outweigh for many knowledge jobs if companies set clear norms

8. Practice prompts

Write plans (3 minutes) for all; full essays for 3 of them.

1. Some people think AI will replace many teachers. To what extent do you agree?
2. Do the advantages of social media outweigh the disadvantages for teenagers?
3. Online degrees are becoming more popular. Is this a positive or negative development?
4. Companies collect large amounts of personal data. What problems does this cause, and what solutions exist?
5. Remote work should be a legal right for office employees. Agree or disagree?
6. Automation is increasing unemployment. Discuss both views and give your opinion.
7. Should governments regulate AI more strictly than social media platforms?
8. Has technology improved education more than it has harmed it?

After writing, check task coverage and idea clarity at <https://stratumielts.com>.

9. Next step on Stratum IELTS

1. Choose prompt #1 or #2.
2. Build a 2-idea outline from this bank.
3. Write in 40 minutes without template spam (Book 8).
4. Submit to the Stratum checker.
5. Rewrite one weak paragraph.

Pair with:

- **Book 7** if you still freeze on ideas
 - **Book 3** for collocations (*data privacy, remote collaboration, digital literacy*)
 - **Book 6** if your score is stuck after good ideas
-

Pocket card

Tech essay =

2 clear human impacts + 1 concrete example each + direct answer

Not a science lecture.
