

IELTS Writing: Education Ideas Bank

Book 15 · Ready angles for the most common Task 2 theme

Stratum IELTS · stratumielts.com

Edition 2026 · Original content

Part of the Stratum IELTS Writing Guide Series

Who this book is for

Education questions appear constantly on exams and YouTube practice lists.

This bank gives **usable angles + examples**, not memorised full essays.

Use with Book 1 structure and Book 7 idea system.

How to use

1. Match the prompt to a sub-theme below.
 2. Pick 2 non-overlapping ideas.
 3. Add one concrete example each.
 4. Write timed. Check at stratumielts.com.
-

Sub-theme idea banks

1) Free / expensive university

- Equal access for talented low-income students
 - Tax burden / funding quality risk
 - Scholarships targeting need vs free-for-all
- Example: student works part-time and delays graduation because of fees

2) Online vs classroom learning

- Access and flexibility
 - Weaker spontaneous discussion / lab practice
 - Blended model as balance
- Example: rural learner joins lectures without relocating

3) Exams vs continuous assessment

- Standard comparison across schools
- Exam stress / narrow teaching-to-test
- Projects show broader skills but harder to standardise

4) Foreign languages early

- Greater pronunciation/flexibility at younger ages
- Crowded primary timetable
- Quality of teaching matters more than start age alone

5) Homework load

- Reinforces learning
- Steals family/rest time; inequality of home support
- Short, focused practice better than volume

6) Practical skills vs academic theory

- Employability (communication, teamwork)
- Strong academic base still needed for many degrees
- Schools can combine both through projects

7) Technology / AI in classrooms

- Personalised practice and fast feedback
- Cheating / over-dependence risk
- Teacher remains guide for ethics and depth
(see also Book 10)

8) Single-sex vs mixed schools

- Fewer social distractions (claimed)
- Real-world mixed environments prepare socially
- Teaching quality usually outweighs school gender mix

9) Arts / sports funding in schools

- Creativity, health, teamwork benefits
- Budget pressure vs maths/science priorities
- Balanced curriculum supports long-term wellbeing

10) Discipline and behaviour policies

- Clear rules create safer learning
- Overly harsh punishment damages trust
- Support + consistent boundaries work better together

Mini outlines

Opinion — university should be free

Position: partly agree (means-tested / strong support, not always unlimited free).

Body 1: access and social mobility

Body 2: funding limits and quality risks

Discussion — homework

View A: necessary practice

View B: overload and inequality

Opinion: short targeted homework + in-class support

Problem/solution — students unprepared for work

Problems: weak soft skills; theory-only courses

Solutions: internships; project-based modules; employer workshops

Practice prompts

1. Should university education be free for all?
 2. Are exams the best way to assess students?
 3. Should practical skills be prioritised over academic subjects?
 4. Is homework necessary for secondary students?
 5. Should children learn foreign languages in primary school?
 6. Has technology improved school education overall?
 7. Should governments spend more on arts education?
 8. Why do some graduates struggle to find jobs, and what can be done?
