

IELTS Writing: Environment & Climate Ideas

Book 23 · Evergreen idea bank for green Task 2 questions

Stratum IELTS · stratumielts.com

Edition 2026 · Original content

Why this book exists

Environment topics rarely disappear from IELTS or YouTube practice lists.
Keep ready angles so you never start from zero.

Core angles

1. **Transport:** cars vs public transit / cycling
 2. **Energy:** fossil fuels vs renewables
 3. **Waste:** recycling, single-use plastic, repair culture
 4. **Responsibility:** individuals vs governments vs companies
 5. **Cities:** green space, air quality, congestion
 6. **Economy trade-off:** short-term cost vs long-term damage
 7. **Education:** environmental awareness in schools
 8. **Flying / tourism:** convenience vs emissions
-

Useful stance patterns

- Individuals help, but **large impact needs policy + industry change**.
 - Green measures can create jobs (renewables, efficiency retrofits).
 - Bans work best with affordable alternatives.
-

Mini outlines

Advantages outweigh? — fewer flights

Advantages: lower emissions

Disadvantages: business/family travel limits

Judgement: benefits outweigh if rail alternatives exist for short trips

Problem/solution — plastic waste

Problems: pollution, wildlife harm, cleanup cost

Solutions: reduce single-use items; deposit schemes; better collection

Discussion — who should pay for climate action?

View A: governments/taxpayers

View B: major polluting companies

Opinion: shared, with stronger rules for high emitters

Practice prompts

1. Should governments ban single-use plastics?
2. Is building more public transport better than raising fuel prices?
3. Can individuals make a real difference to climate change?
4. Do the advantages of international tourism outweigh environmental costs?
5. Why is air pollution rising in cities, and what solutions exist?
